MESSINGER, THE ORIGINAL BEARING MANUFACTURER, IS THE NATURAL CHOICE WHEN YOU NEED A REPLACEMENT.

For over 90 years, Messinger Bearings has manufactured and designed large scale steel mill equipment bearings. Throughout the years, Messinger Bearings has been the prime bearing supplier to leading original equipment manufacturers in the steel mill industry including Mesta, United Engineering & Foundry, Cold Metal Process, and Philadelphia Gear, to name a few.

Messinger has designed and manufactured bearings for steel mill applications that include:

- Plate mills
- Blooming mills
- Cold strip mills
- Hot strip mills
- Slabbing mills
- Pickling machines
- BOF drives
- Plate levelers
- Roll grinders
- Flying shears
- Rotary crop shears
- Four high roll stands
- Large overhead cranes

Only Messinger can manufacture these bearings to the original design specifications of the OEM because we designed them for the OEM to begin with.

So the next time you need to replace a bearing, simply contact Messinger and give us your part number. Whether it's an OEM or another bearing manufacturer such as Torrington, American (ARB), Rollway, or others, chances are we'll be able to trace your bearing back to the OEM specification that Messinger designed for the steel mill.
